You are deploying a Static Site

Source Code

pricnitz / HRMS • 2m ago Edit

Name
A unique name for your static site.

HRMS-client

Project Optional
Add this static site to a project once it's created.

Select a project... / Select an environment...

Branch
The Git branch to build and deploy.

main

Root Directory Optional
If set, Render runs commands from this directory instead of the repository root. Additionally, code changes outside of this directory do not trigger an auto-deploy. Most commonly used with a monorepo.

`client`

Build Command
Render runs this command to build your app before each deploy.

`client/ $ npm install; npm run build`

Publish Directory
The `relative` path of the directory containing built assets to publish. Examples: `./`, `./build`, `dist` and `frontend/build`.

`client/ e.g. build`

Environment Variables

Set environment-specific config and secrets (such as API keys), then read those values from your code. Learn more.

NAME_OF_VARIABLE | value | Generate

+ Add Environment Variable | Add from .env
